**After my long journey
through the arts, I
devoted myself to
painting in sunny Spain.
To express myself in all
those colors I truthly love.**

Lives in Calahonda. Born in 1945 in Luxembourg. His art is based primarily on immense creativity made up of many facets. Everything begins with an idea "or you could say, with many ideas" he explains. All ideas emanate from our daily life; they are a melting pot of culture, philosophy and trivia with a background in architecture, anatomy and other disciplines. Analysis, communication and the symbiotic relationship between them all, give rise to this overwhelming creativity. It is not only in the richness of his ideas where he best expresses himself, but also in vibrant colour schemes and a generous harmony of the whole. All this is offered up to the viewer in a poetical collection of his works.
